TAFT'S POLICY IS UNCHANGED

Awaits Decision In Oil and Tobacco Cases

LAW MUST BE OBEYED

Trusts and Combines Operating Illegally Must Change Their Methods

That President Taft has not grown lukewarm or wearied of his trust busting campaign was evidenced by his remarks to certain recent callers at the white house. A special to the Globe-Democrat gives the following:

"With the beef trust already under fire and the Standard Oil and American Tobacco Company cases in the hands of the Supreme Court, it was made known today by callers at the white house that the administration is planning a crusade of trust busting such as this country has never seen since the passage of the Sherman anti-trust law, about twenty years ago.

"President Taft, it was made known, is waiting only for the decision of the Supreme Court in the Standard Oil and tobacco cases before he begins his campaign against the trusts. He is firmly convinced, it was declared, that the highest tribunal will decide against the oil trust and the tobacco trust, and after that he intends to begin the prosecution of every illegal combination which he can find.

"Already, it was made known, the Department of Justice has started investigation of many corporations which it believed were operating in restraint of trade. It could not be learned just what corporations the department is probing, but it was stated that any suspected of controlling prices or unjust discrimination and illegally maintaining a monopoly of any product are subject to inquiry.

"If necessary, it was said, the administration will greatly augment the force of special counsel and investigators of the Department of Justice. It will procure all the talent the president thinks the campaign he is about to launch will demand.

"President Taft, it was asserted, was tired of having reports go out that he has changed his mind, he was more firmly convinced than ever that he must proceed and must keep to the pledges he made publicly in respect to the enforcement of law and the breaking down of monopolies and illegal combinations.

"The president has been waiting for the decisions of the Supreme Court in the oil and tobacco cases, not because he feared that they will be adverse, but because he believed, it was said, that they will be favorable to the government. It will then be a plain matter of duty with the administration to begin further prosecutions."

Monorail Success Assured

The success of the monorail and the recent tests of a full-sized car of this type are discussed in an illustrated article appearing in the February number of Popular Mechanics. The article states:

"The tests of the car were made on a track 1,980 ft. long, 440 ft. of which was laid in a circle, while the remaining 1,320 ft. was a straight stretch. The wheels of the car, as is shown in one of the illustrations, are four, mounted two and two in two in-

dependent tandem trucks. When on a straight track all the wheels are, of course, running in a straight line, but, as the center pins of the trucks are connected to the body of the vehicle by means of ball bearings, there is considerable flexibility in rounding curves. So much, in fact, that reverse curves of 35-ft. radius were readily negotiated.

"The car used in the tests consists of a platform 10 ft. wide and 40 ft. long, at one end of which is a cab containing the propelling and controlling mechanism. The propelling machinery consists of two gasoline engines of practically the same type as an automobile engine, one being rated at 80 hp. and the other at 20 hp."

Undertaking Business Sold

The Bockson-Newton Undertaking company recently purchased the business of the Drain-Melone Undertaking company. The latter name has been serving the people here for several years with the utmost satisfaction to their patrons and only quit the field at this time on account of Mr. Drain finding the work more than he can attend to in connection with his other interests. The purchasing company has also been in business for sometime here and its service will continue to be satisfactory to patrons as it has been in the past.

HOT SPRINGS HOTEL DESTROYED BY FIRE

Ninety Two Guests Aroused Early Sunday Morning—All Escape

Hot Springs, Jan. 23.—The

New Waverly hotel was completely destroyed by fire early this morning. Although there were 92 guests in the hotel at the time of the fire, and all had retired for the night, every one escaped without injury. All lost their clothing, however, and the stores were opened this morning, in order that they might secure new outfits. The majority of the guests were forced out in exceedingly scanty attire.

The fire broke out at 2 o'clock this morning. The building was a frame structure and the flames spread rapidly. The fire was discovered by Night Clerk Scott Klinnich, who realizing the danger of the guests, started on a whirlwind tour of the entire building.

He stopped at every door long enough to thoroughly arouse the occupant of the room and when the room of an invalid was reached, special attention was given, and all of the helpless were carried down the steps.

The guests made their exit by means of the stairways, as the elevator shaft was a solid sheet of flames.

The hotel was one of the most important in the city. The loss is considerable.

The bath house, operated in connection with the hotel, was also destroyed.

Elks Have Initiation

Wednesday evening of last week witnessed some tall capers in the reservation of the B. P. O. E's in this city. There was a class of six initiated into the mysteries of the lodge—the largest class in the history of the local lodge.

Owing to the dimensions of the occasion each member was there for the sole purpose of making it an occasion to be remembered by the candidates and if rumor may be credited the affair was a success.

The following were the candidates: Dr. W. H. Buckley, Maj. J. T. Waddill, R. C. Slater, Frank Wallace, Ervin Clayton and C. W. Connor. After the initiation, the participants enjoyed a banquet.

An Aviation Jingle

Dr. J. B. Ellis a brother of Dr. C. F. Ellis whom many remember used to practice here sends a letter from Long Beach, California, in the following jingling style after viewing the great feats at the aviation meet at Los Angeles.

Coming Home To Arkansas

I suppose you've been a readin' 'bout the areoplanes and things, That are flyin' through the heavens, like vehicles with wings— They've been sailin' over the orchards a score or more at least, And I'm goin' to build one of my own, and take a trip back east. So keep your optics turned toward the gold tipped western sky And you'll see me sailing homeward in an airship by and by.

And when I start to flyin', you bet I'll set the pace For the eagles, and the pigeons, and all the swift winged race, I'll break all the laws and ordinances 'gainst speed that ever were, I'll just fade from where I now am, and appear again elsewhere. So keep a gazing westward at the yellor sunset sky, For I'm coming back to Arkansas in an airship by and by.

There'll be no limit to my speed when I begin to fly, There'll only be a dark streak in the air as I pass by— All the birds and other beasts will fly in terror from the sight And I fear that many natives will be droppin' dead from flight, But I'm goin' to make a record—burn a streak across the sky, When I return to Arkansas in an airship by and by. I'll eat my breakfast here at home, at the regular time o' day, And I'll probably eat a luncheon at some point about midway— But I'll be with you at the proper time to share the evenin' meal.

So remember that I'm coming, and prepare the fatted veal. Just keep your weather eye upon the golden western sky, For I'm comin' back to Arkansas in an airship by and by.

TWO LADIES FOUND IN PITIFUL STATE

Death Relieves One Soon After the Discovery

Mrs. C. F. Humphrey and Sister Found Ill and Unattended In Home

On Wednesday of last week, Mesdames Whiting, Clayton and Turner of Spring street, found Mrs. C. F. Humphrey and her sister, Miss Eliza Williams, both in a critical condition at their home which they occupied alone.

The elderly ladies were both quite ill—Miss Williams so seriously so that death relieved her not long after the discovery. Although Dr. Floyd was immediately called and did all in his power, the patient had not vitality enough to survive. Mrs. Humphrey under the kind ministrations of the physician and neighbors was soon made comfortable.

The ladies had occupied the large and handsome home alone since the recent death of Mr. Humphrey. Their preference was for a secluded life and neighbors thought nothing of not seeing them for days at a time as they occupied the lower and back portion of the home. It was only when the water deliveryman had failed on two visits to get any response that an investigation was had with the above results.

Dr. Floyd notified relatives in Illinois of the condition of things and on Friday evening a nephew

ARKANSAS THE DIAMOND STATE

Governor Donaghey Writes of Resources

Has Everything Produced Elsewhere and Some Exclusively Her Own

Governor Donaghey writes in Colliers of the state of Arkansas as follows:

"Nature having endowed the South with every resource possible, it can not but follow that within the next twenty years, or perhaps within a shorter period, it will be the most productive section of the world, and one of the wealthiest.

Among these Southern States I am firmly convinced that Arkansas will lead the rest, both in varied resources and productivity. It possesses all the resources that are found in other Southern States, and has some that are nowhere present in any other State in the Union. These exceptions are the diamond fields of Pike County and the inexhaustible deposits of bauxite, in Pulaski and Saline Counties, the largest in the world. It has more running streams from which hydro-electric power may be generated than any other State, some of which are now being harnessed that power may be secured from them for the operation of interurban lines. It produces 147 minerals, the greatest of which is zinc, and has deposits

of silver, lead, iron, copper, and other valuable minerals. It has the largest deposits of coal in the South, and the largest deposits of oil in the West. It has the largest deposits of gas in the South, and the largest deposits of phosphate in the West. It has the largest deposits of sulfur in the South, and the largest deposits of salt in the West. It has the largest deposits of limestone in the South, and the largest deposits of granite in the West. It has the largest deposits of marble in the South, and the largest deposits of slate in the West. It has the largest deposits of sand in the South, and the largest deposits of gravel in the West. It has the largest deposits of brick in the South, and the largest deposits of tile in the West. It has the largest deposits of cement in the South, and the largest deposits of concrete in the West. It has the largest deposits of iron in the South, and the largest deposits of steel in the West. It has the largest deposits of copper in the South, and the largest deposits of brass in the West. It has the largest deposits of tin in the South, and the largest deposits of lead in the West. It has the largest deposits of zinc in the South, and the largest deposits of silver in the West. It has the largest deposits of gold in the South, and the largest deposits of platinum in the West. It has the largest deposits of nickel in the South, and the largest deposits of cobalt in the West. It has the largest deposits of manganese in the South, and the largest deposits of chromium in the West. It has the largest deposits of aluminum in the South, and the largest deposits of silicon in the West. It has the largest deposits of boron in the South, and the largest deposits of iodine in the West. It has the largest deposits of bromine in the South, and the largest deposits of fluorine in the West. It has the largest deposits of chlorine in the South, and the largest deposits of oxygen in the West. It has the largest deposits of hydrogen in the South, and the largest deposits of nitrogen in the West. It has the largest deposits of carbon in the South, and the largest deposits of sulfur in the West. It has the largest deposits of phosphorus in the South, and the largest deposits of potassium in the West. It has the largest deposits of sodium in the South, and the largest deposits of calcium in the West. It has the largest deposits of magnesium in the South, and the largest deposits of barium in the West. It has the largest deposits of strontium in the South, and the largest deposits of yttrium in the West. It has the largest deposits of lanthanum in the South, and the largest deposits of cerium in the West. It has the largest deposits of praseodymium in the South, and the largest deposits of neodymium in the West. It has the largest deposits of promethium in the South, and the largest deposits of samarium in the West. It has the largest deposits of europium in the South, and the largest deposits of gadolinium in the West. It has the largest deposits of terbium in the South, and the largest deposits of dysprosium in the West. It has the largest deposits of holmium in the South, and the largest deposits of erbium in the West. It has the largest deposits of thulium in the South, and the largest deposits of ytterbium in the West. It has the largest deposits of lutetium in the South, and the largest deposits of hafnium in the West. It has the largest deposits of tantalum in the South, and the largest deposits of niobium in the West. It has the largest deposits of tungsten in the South, and the largest deposits of molybdenum in the West. It has the largest deposits of rhenium in the South, and the largest deposits of ruthenium in the West. It has the largest deposits of rhodium in the South, and the largest deposits of palladium in the West. It has the largest deposits of silver in the South, and the largest deposits of gold in the West. It has the largest deposits of platinum in the South, and the largest deposits of iridium in the West. It has the largest deposits of osmium in the South, and the largest deposits of iridium in the West. It has the largest deposits of ruthenium in the South, and the largest deposits of rhodium in the West. It has the largest deposits of palladium in the South, and the largest deposits of silver in the West. It has the largest deposits of gold in the South, and the largest deposits of platinum in the West. It has the largest deposits of iridium in the South, and the largest deposits of osmium in the West. It has the largest deposits of ruthenium in the South, and the largest deposits of rhodium in the West. It has the largest deposits of rhodium in the South, and the largest deposits of palladium in the West. It has the largest deposits of palladium in the South, and the largest deposits of silver in the West. It has the largest deposits of silver in the South, and the largest deposits of gold in the West. It has the largest deposits of gold in the South, and the largest deposits of platinum in the West. It has the largest deposits of platinum in the South, and the largest deposits of iridium in the West. It has the largest deposits of iridium in the South, and the largest deposits of osmium in the West. It has the largest deposits of osmium in the South, and the largest deposits of ruthenium in the West. It has the largest deposits of ruthenium in the South, and the largest deposits of rhodium in the West. It has the largest deposits of rhodium in the South, and the largest deposits of palladium in the West. It has the largest deposits of palladium in the South, and the largest deposits of silver in the West. It has the largest deposits of silver in the South, and the largest deposits of gold in the West. It has the largest deposits of gold in the South, and the largest deposits of platinum in the West. It has the largest deposits of platinum in the South, and the largest deposits of iridium in the West. It has the largest deposits of iridium in the South, and the largest deposits of osmium in the West. It has the largest deposits of osmium in the South, and the largest deposits of ruthenium in the West. It has the largest deposits of ruthenium in the South, and the largest deposits of rhodium in the West. It has the largest deposits of rhodium in the South, and the largest deposits of palladium in the West. It has the largest deposits of palladium in the South, and the largest deposits of silver in the West. It has the largest deposits of silver in the South, and the largest deposits of gold in the West. It has the largest deposits of gold in the South, and the largest deposits of platinum in the West. It has the largest deposits of platinum in the South, and the largest deposits of iridium in the West. It has the largest deposits of iridium in the South, and the largest deposits of osmium in the West. It has the largest deposits of osmium in the South, and the largest deposits of ruthenium in the West. It has the largest deposits of ruthenium in the South, and the largest deposits of rhodium in the West. It has the largest deposits of rhodium in the South, and the largest deposits of palladium in the West. It has the largest deposits of palladium in the South, and the largest deposits of silver in the West. It has the largest deposits of silver in the South, and the largest deposits of gold in the West. It has the largest deposits of gold in the South, and the largest deposits of platinum in the West. It has the largest deposits of platinum in the South, and the largest deposits of iridium in the West. It has the largest deposits of iridium in the South, and the largest deposits of osmium in the West. It has the largest deposits of osmium in the South, and the largest deposits of ruthenium in the West. It has the largest deposits of ruthenium in the South, and the largest deposits of rhodium in the West. It has the largest deposits of rhodium in the South, and the largest deposits of palladium in the West. It has the largest deposits of palladium in the South, and the largest deposits of silver in the West. It has the largest deposits of silver in the South, and the largest deposits of gold in the West. It has the largest deposits of gold in the South, and the largest deposits of platinum in the West. It has the largest deposits of platinum in the South, and the largest deposits of iridium in the West. It has the largest deposits of iridium in the South, and the largest deposits of osmium in the West. It has the largest deposits of osmium in the South, and the largest deposits of ruthenium in the West. It has the largest deposits of ruthenium in the South, and the largest deposits of rhodium in the West. It has the largest deposits of rhodium in the South, and the largest deposits of palladium in the West. It has the largest deposits of palladium in the South, and the largest deposits of silver in the West. It has the largest deposits of silver in the South, and the largest deposits of gold in the West. It has the largest deposits of gold in the South, and the largest deposits of platinum in the West. It has the largest deposits of platinum in the South, and the largest deposits of iridium in the West. It has the largest deposits of iridium in the South, and the largest deposits of osmium in the West. It has the largest deposits of osmium in the South, and the largest deposits of ruthenium in the West. It has the largest deposits of ruthenium in the South, and the largest deposits of rhodium in the West. It has the largest deposits of rhodium in the South, and the largest deposits of palladium in the West. It has the largest deposits of palladium in the South, and the largest deposits of silver in the West. It has the largest deposits of silver in the South, and the largest deposits of gold in the West. It has the largest deposits of gold in the South, and the largest deposits of platinum in the West. It has the largest deposits of platinum in the South, and the largest deposits of iridium in the West. It has the largest deposits of iridium in the South, and the largest deposits of osmium in the West. It has the largest deposits of osmium in the South, and the largest deposits of ruthenium in the West. It has the largest deposits of ruthenium in the South, and the largest deposits of rhodium in the West. It has the largest deposits of rhodium in the South, and the largest deposits of palladium in the West. It has the largest deposits of palladium in the South, and the largest deposits of silver in the West. It has the largest deposits of silver in the South, and the largest deposits of gold in the West. It has the largest deposits of gold in the South, and the largest deposits of platinum in the West. It has the largest deposits of platinum in the South, and the largest deposits of iridium in the West. It has the largest deposits of iridium in the South, and the largest deposits of osmium in the West. It has the largest deposits of osmium in the South, and the largest deposits of ruthenium in the West. It has the largest deposits of ruthenium in the South, and the largest deposits of rhodium in the West. It has the largest deposits of rhodium in the South, and the largest deposits of palladium in the West. It has the largest deposits of palladium in the South, and the largest deposits of silver in the West. It has the largest deposits of silver in the South, and the largest deposits of gold in the West. It has the largest deposits of gold in the South, and the largest deposits of platinum in the West. It has the largest deposits of platinum in the South, and the largest deposits of iridium in the West. It has the largest deposits of iridium in the South, and the largest deposits of osmium in the West. It has the largest deposits of osmium in the South, and the largest deposits of ruthenium in the West. It has the largest deposits of ruthenium in the South, and the largest deposits of rhodium in the West. It has the largest deposits of rhodium in the South, and the largest deposits of palladium in the West. It has the largest deposits of palladium in the South, and the largest deposits of silver in the West. It has the largest deposits of silver in the South, and the largest deposits of gold in the West. It has the largest deposits of gold in the South, and the largest deposits of platinum in the West. It has the largest deposits of platinum in the South, and the largest deposits of iridium in the West. It has the largest deposits of iridium in the South, and the largest deposits of osmium in the West. It has the largest deposits of osmium in the South, and the largest deposits of ruthenium in the West. It has the largest deposits of ruthenium in the South, and the largest deposits of rhodium in the West. It has the largest deposits of rhodium in the South, and the largest deposits of palladium in the West. It has the largest deposits of palladium in the South, and the largest deposits of silver in the West. It has the largest deposits of silver in the South, and the largest deposits of gold in the West. It has the largest deposits of gold in the South, and the largest deposits of platinum in the West. It has the largest deposits of platinum in the South, and the largest deposits of iridium in the West. It has the largest deposits of iridium in the South, and the largest deposits of osmium in the West. It has the largest deposits of osmium in the South, and the largest deposits of ruthenium in the West. It has the largest deposits of ruthenium in the South, and the largest deposits of rhodium in the West. It has the largest deposits of rhodium in the South, and the largest deposits of palladium in the West. It has the largest deposits of palladium in the South, and the largest deposits of silver in the West. It has the largest deposits of silver in the South, and the largest deposits of gold in the West. It has the largest deposits of gold in the South, and the largest deposits of platinum in the West. It has the largest deposits of platinum in the South, and the largest deposits of iridium in the West. It has the largest deposits of iridium in the South, and the largest deposits of osmium in the West. It has the largest deposits of osmium in the South, and the largest deposits of ruthenium in the West. It has the largest deposits of ruthenium in the South, and the largest deposits of rhodium in the West. It has the largest deposits of rhodium in the South, and the largest deposits of palladium in the West. It has the largest deposits of palladium in the South, and the largest deposits of silver in the West. It has the largest deposits of silver in the South, and the largest deposits of gold in the West. It has the largest deposits of gold in the South, and the largest deposits of platinum in the West. It has the largest deposits of platinum in the South, and the largest deposits of iridium in the West. It has the largest deposits of iridium in the South, and the largest deposits of osmium in the West. It has the largest deposits of osmium in the South, and the largest deposits of ruthenium in the West. It has the largest deposits of ruthenium in the South, and the largest deposits of rhodium in the West. It has the largest deposits of rhodium in the South, and the largest deposits of palladium in the West. It has the largest deposits of palladium in the South, and the largest deposits of silver in the West. It has the largest deposits of silver in the South, and the largest deposits of gold in the West. It has the largest deposits of gold in the South, and the largest deposits of platinum in the West. It has the largest deposits of platinum in the South, and the largest deposits of iridium in the West. It has the largest deposits of iridium in the South, and the largest deposits of osmium in the West. THE EUREKA SPRINGS TIMES

L. E. BAIRD, Editor and Manager.

Successors to the Weekly Times-Echo. Times established 1881. Echo established 1885.

Published every Thursday by the Times Publishing Company of Eureka Springs, Arkansas.

A Newspaper devoted to the interests of Eureka Springs, Carroll County and the Republican party.

Entered at the Postoffice at Eureka Springs, Arkansas, as second-class mail matter.

SUBSCRIPTION ONE DOLLAR THE YEAR.

THE TREASURE-SEEKERS

One sought the east for gems, and found, alas
Dire failure was his most unhappy pass.
One sought for pearls in the waters of the Ind,
And sank a victim of the seas and wind.
Another sought the gold that glitters free
Upon the strand far in the Northern sea,
And on the beaches of that land of white
His bones lie resting in the endless night.
A fourth plunged in the nearer fray to win
The gaudy raiment that the Trade-Elves spin,
And at the last found coffers full of dross—
The gold was profit, but his soul was loss!
For me in fortunes strife, give me the part
Of him that delves deep in the Mines of Heart—
Not far afield, but here let me secure
From them that love me treasures that endure.—John Kendrick Bangs,
In Success Magazine.

COMMISSION GOVERNMENT

Still the sentiment for commission form of government grows and in it may be seen the possibility of the downfall of the ward healer, the pie hunting politician and the political grafter. There seems a possibility for the city having the commission form of government, that the people's money may be spent for the people and that the pesky little parasitic grafter, as well as the bigger ones, may be relegated to the dim and distant past. If such a thing can be accomplished by the commission form of government the cities of Arkansas certainly need it.

Recently at Lexington, Ky., a mass meeting was called by the commercial club and resolutions were adopted favoring the commission form of government. Legislative action will be necessary before the proposed new charter can be adopted and a meeting has been called for the near future at Lexington, at which it is expected there will be delegates from all the principal cities of the state, the object being to take the whole matter under consideration with a view of securing the necessary legislation.

Memphis, Tenn., is ready to enter upon the experiment. Her charter granted by the last state legislature. This charter is similar to those under which Galveston and Houston, Tex., are governed and places the entire management of the city's affairs in the hands of the mayor and four commissioners. Almost a similar plan is proposed for Chattanooga.

The legislature of Mississippi passed a law in 1908 providing for commission government. As yet no Mississippi city has adopted it, but Hattiesburg is now agitating the question and proposes asking for a charter under which the city will be governed by a mayor and three commissioners, all to be elected from the city at large without regard to ward lines.

The Times suggests that the matter be taken up in the proper way to secure the privilege of commission form of government for Arkansas cities. A better form

of municipal government for the cities of the state is certainly needed.

The Times advocates the putting a tax of one cent on every gallon of water shipped out of Eureka Springs.

Seattle, Wash., is asking for a constitutional amendment providing for a commission plan of government.

Is it not time the city affairs were put in the hands of men who will give them business consideration and not make the office a stepping stone to boost political fortunes?

A tax of one cent per gallon on water shipped out of this city would furnish a splendid fund for beautifying our reservations and furnishing music during the summer.

In round numbers the city of Chicago pays \$50,000 per annum for the street car riding of her "plain clothes" policemen. This means 1,000,000 rides per year by about 100 men.

If the United States government owes the state of Arkansas \$1,000,000, let us have it by all means and especially if it is to go into "good roads" fund of the state. We could use a few good roads.

The land wide revolt and the various investigations, both by states and the United States government, and the protests by numerous organizations, should have the effect of locating the blame for the high price of living at this time. When the American people become thoroughly aroused they will go to the bottom of things and facts will stand out boldly.

The only thing charged against the republican party, and a wrong charge at that, is the high prices. But it is found that even higher prices prevail in England, France and Germany, with the difference that over there the people simply have to go without while here nearly every one has the means to live comfortably and well. Prices them-

selves are not the result of republicanism, but having the price is, and that is why the people sustain the republican party and will continue to do so.—Ex.

From the present workings of the "robber tariff," it is evident that the democrats will be without a paramount issue in the near future.

Gentle reader, don't you accredit Arkansas prosperity to democratic rule. Our vast coal, lumber, mineral fruit, rice and cotton industries are making the state rich, but every day is reducing our resources. Elect men who will not waste your revenues but will protect and promote home growth and development.—Salem Sun.

In other words elect republicans.

Can any one give a good excuse for giving away any franchise of the city? Especially can anyone defend the giving any one or any company the privilege of shipping Eureka Springs water? It is a "cinch" that people will not visit this resort, if they can get Eureka Springs water in their own comfortable homes. If such franchise can not be revoked, then place such a tax on each gallon shipped as will compensate the city for its loss of visitors.

The ousting of Pinchot, the head of the forest service is one of the most trying ordeals the president has faced. It seemed to be a case wherein the man thought he was larger than his office, larger than the president. In some features Pinchot may be right, but the main charge is insubordination. The trouble grew out of his fight with Ballinger, and the charges of his subordinate Glavis, of dishonesty against Ballinger, whether true or not, were such as could not be passed over lightly, and it appears that Mr. Pinchot did not conduct himself with the dignity and straightforwardness as impressed the people favorably. His efforts to save the timber and protect the government's rights were commendable, but the question now is, was he sincere.—State Line Republican.

FARM AND FIELD

Hints For the Farmer and Stockman

All About the Farm

Clover sod put into corn always produces a crop of big ears.

The farmer who plants by the signs of the zodiac may have to feed his stock on moonshine.

Sweet potatoes yield about 90 bushels to the acre the country over, according to the department of agriculture.

Commercial fertilizers are profitable when rightly used, but he is a poor manager who does not save all liquid and solid manures before buying that which comes in bags.

Every young man or woman who expects to engage in farming or home making should seek preparation for his or her business by taking a course in agricultural or household science.

The waste of farm machinery is something scandalous. Twelve carloads of scrap iron were recently shipped from one small western town, and it represented just so much farm machinery, which ought to be in good repair and serviceable for several years. Hope you have none wintering out of doors.

Seed Time

Now is the time to get seeds ready for spring planting. It is poor policy to wait until the last minute. The oldest and most reliable seed houses are now advertising freely and the ads. make interesting reading. Give any of them a chance early and they will return good service and furnish good seed.

One good, lively seed is worth more than two poor ones. The labor of planting and cultivating is the same, the rent of the ground is practically the same with poor seed as it is with good seed, but the yield at harvest time is very different.

There are instances on record

where pedigreed seed oats have increased the yield from six to eight bushels per acre over common seed in the same field under the same cultural conditions.

The same principle holds good in all farm crops, but it is hard to pick up superior seeds at the last moment when there is nothing but leavings to choose from.

A Money Saver

While more cream separators are being used each succeeding year, their real value is not understood by the average farmer. They are considered a sort of luxury, but the fact is, a good cream separator is too valuable to do without. If a man has more than two cows he ought to have a separator. It is worth all it costs simply to get the work out of the way quickly. Labor is about the most expensive commodity that farmers have to take into account, so that time is more expensive than machinery. Business like farmers who appreciate the value of time are the ones to buy cream separators.

The milk is handled but once and the cream is taken care of easily and the skim milk is fed while still warm so that the animals get the full benefit. Cold, stale milk is not worth half as much to a calf or a pig or a chicken as fresh, warm milk directly from the cow by way of the separator. A good separator will save its cost in cream alone, but it is the other features that should be considered first.

Skim milk is a splendid feed for young animals if it is handled quickly, but it loses its value rapidly during the cooling process.

Poultry Pickings

The song of the hen is an epic of good times.

Learn to handle 100 chickens successfully before trying 1000.

Most of the plants that are started up to make poultry in factory

CONTEST NOTICE

Department of the Interior,
U. S. Land Office, Harrison, Ark.
December 30, 1909.

A sufficient contest affidavit having been filed in this office by Clarence C. Shatto, contestant, against homestead entry No. 366422, made Jan. 13, 1908, for SE NW, SW NE, Sec. 12, Twp. 20 N, Range 27 W, 5th Principal Meridian, by Frederick Bruton, Contestee, in which it is alleged that said Frederick Bruton has not cultivated, improved or resided upon said land in the manner provided by law for more than six months next before the filing of the affidavit and that he on the day of October, 1908, abandoned said land and has since that time been absent from said land; said parties are hereby notified to appear, respond, and offer evidence touching said allegation at 10 o'clock a. m. on Feb. 8, 1910, before John B. Pendergrass, U. S. Commissioner, at his office at Eureka Springs, Ark., and that final hearing will be held at 10 o'clock a. m. on Feb. 12, 1910, before the Register and Receiver at the United States Land Office in Harrison, Ark.

The said contestant having, in a proper affidavit, filed Dec. 24, 1909, set forth facts which show that after due diligence personal service of this notice can not be made, it is hereby ordered and directed that such notice be given by due and proper publication.

W. N. IVIE, Register.

J. W. FREEMAN, Receiver.

STOCKHOLDERS MEETING

The stockholders of the Times Publishing Co., of Eureka Springs, Ark., are called to meet in room 14, Ellis-Rosewater building, on Wednesday, February 2, 1910, at 7:30 p. m. Annual meeting for the election of officers and transaction of other business.

PLENTY OF WATER

AT GREEN FOREST

Ozark Hills Seem to Have Plenty of Water Says Mr. Payne

A representative of the Times was informed by Mr. Tom Payne that their endeavors to sink the drill hole near Green Forest was proceeding as fast as the hard rock and the amount of water would permit. Mr. Payne says they have to stop frequently to pump the hole and that at the present depth the well is furnishing about fifty barrels of water per hour. This does not look as though drilling for water at Eureka Springs would result in a dry hole.

Mr. Payne is a property owner in Eureka Springs and looks with great favor and feasibility of securing water for the city mains by the way of deep wells.

His experience at Green Forest is bearing out his belief. Many people are watching with intense interest, the water phase of the drilling at Green Forest.

He Resigned

The mayor of Van Buren is a candidate for a county office and in order to not neglect his duties as mayor he has resigned that office and will devote his time to his campaign at his own expense and not at the expense of his home city. This is respectfully referred to Claude Fuller, mayor of Eureka Springs, who is a candidate for prosecuting attorney.—North Arkansas Star.

For Improvement of Roads

Washington.—The latest of numerous contributions to proposed legislation for highway construction in the United States is a bill by Representative Garner of Texas, appropriating \$10,000,000 among the states and territories, pro rata, according to mileage of the traveled public roads in the respective jurisdictions. The fund, according to

Garner's ideas, should be apportioned by the secretary of agriculture after certification of the governors as to the amounts needed, etc., and the amount allowed each state is not to exceed the state's own appropriation for road maintenance. Within the past week Mr. Sulzer introduced a postal savings bank bill, desired to produce, according to his scheme of figuring, half a billion dollars of deposits from the people in the postal banks, \$100,000,000 of the amount to be spent on road construction. Mr. Sulzer figured that this plan would bring into circulation millions of hoarded gold and restore to work thousands of idle workmen.

Rev. Tuck Minrick filled his regular appointment at Rock Spring Sunday.

A. W. Jackson was in Eureka Springs, Monday, shopping with Times advertisers.

C. P. Alderson moved onto Tom Gossage's place last week. Good luck to you Mr. Alderson.

Otto McCall's oldest daughter is very low with fever, her friends and parents hope for a speedy recovery.

Try roasting corn on the cob in the oven on cold, blustering days. Cut it up in short lengths and allow the hens to pick it off.

To make hens lay, put some oats in a box, pour warm water over them, and keep in a warm place. Feed a small quantity to hens each morning after the oats begin to grow and get green. Oats soaked in milk are splendid.

KITCHEN KABINET COLUMN

Busy Housekeeper's Reference Page

Prepare a chicken as for fry, or parboil, then add one Virginia pared potato for each stew one to eat, a handful of soaked green lima beans, corn cut from two roasting ears, three ripe tomatoes, salt and pepper to taste. Cook in a quart of water an hour and half.

Cold boiled potatoes, and any other vegetable desired Nut that happens to be on Hash hand, may be used.

Chop fine, heat quickly in well buttered frying pan, salt to taste, and when thoroughly hot, stir in lightly a large spoonful of nut meal for each person to be served, and serve at once.

Is made by putting the meats through a food chopper with the finest cutter on Meal (I use the nut-butter grinder, screwed on rather loosely), or the nuts may be rubbed through a sieve, but this is, of course, slower work. Any kind of nuts may be used in the various dishes, whichever is most easily obtained.

Select even-sized potatoes, wash and bake them. Cut Stuffed off one end, scrape Potatoes out the centers, leaving the skins whole. Mash the potato and season with salt and butter, add a generous portion of nut meat, and return the mixture to the shells; cover the tops with pieces cut off, and serve. Before beginning, all materials should be placed ready at hand, so that the work may proceed rapidly, and the potatoes served while still hot.

Soak a cup of dry Lima beans over night. In the Lima Beans morning slip off With Nuts the skins (which is

rapid work as they are so large), put them in the bean pot with plenty of water, and salt to season rather more than when cooked without nuts. Let them cook slowly in the oven until perfectly tender, then add a half cup of nut meal, let cook a few minutes longer, and serve. If preferred, the nuts may be blanched by letting them stand for a few minutes in boiling water, then throwing them into cold water, and then the skins may be easily removed, then put one-half cup of the blanched meats in to cook with the beans.

Take cooked beans or peas and pass them through a

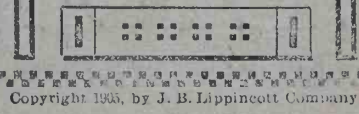

Nut Roast colander to remove the skins. Then mix them with an equal amount of finely ground or chopped nut meats, and season to taste. Place one-half of the mixture in a buttered baking dish, and over it spread a dressing made as follows: Pour boiling water over four slices of zwieback cover and let stand for a few minutes, then break it up with a fork and mix with it one-half cup of cream, sage and salt to taste. Cover the dressing with the remainder of the nut mixture, pour one-half cup of cream over all, and bake for one and one-half hours. Cut in slices, and serve with cranberry sauce.

Any owning a few bearing black walnut trees should count their product The Menu the most valuable crop raised for home consumption. According to government report, the black walnut is the most nutritious of our native nuts. Being large, it is easily prepared, and being plentiful in the western states, it is cheap and easily obtained. Nut meats are more than twice as nutritious as any kind of flesh foods, and were they made to take its place the gain in health would be incalculable. Nuts may form the foundation of many substantial dishes. Also, it should be borne in mind nuts are a very concentrated food and but a comparatively small quantity of them is needed to what would be needed of less nutritive food. I will give a few recipes for preparing nuts for the table, and any cook can originate other dishes to suit her needs.

The Master of Craven

By Marie Van Vorst

"Amanda of the Mill,"
"Miss Desmond,"
etc., etc.

Copyright 1904, by J. B. Lippincott Company.

Tempest caught his breath. "You mean you were serious? You came to England to see me, and are going back on the first ship?"

"Yes," she said simply. "But I never heard such a venture! Is all reporting work like that? Seven thousand mile for—"

"Success—yes," she finished. "I suppose so. It seemed to them worth it. I should, of course, have succeeded."

"But you have traveled before—you know Europe?"

"Oh, yes," she said. "I was in school in France. I have traveled, but I have never been in England."

"You must stay," he cried enthusiastically. "England's a garden—this country especially lovely. Why, Pen-then castle is within two miles of me—Raynes and the forest of Raynes."

"I know," said his companion—Here to the west, low shelving to the sea, and she repeated one of Tempest's sonnets written 15 years before. Her manner of speaking it was delightful, unadorned, understanding, and simple.

He said nothing when she ceased. He did not speak again until they had entered the small hamlet of Cravenford and drew up to the station under a red lantern that swung from the eaves in the rain.

Two men in raincoats stood smoking their pipes under the roof shelter. At Tempest's "Hallo" one of them came out to the platform edge.

"Is that you, Mr. Tempest, sir?"

"Yes, hold the mare, will you, Ramsdill?"

"There'll be no London train to-night, sir—a haccident Slug Morges way. No trains out before to-morrow."

There was a moment's silence on the part of the people in the trap. Then the lady said: "But there are other trains, surely, to other stations?"

"None either way to-night, m'm," reassured Mr. Ramsdill.

Tempest stood up in the cart and shook out his hat from which the water ran. Ramsdill at the mare's head patted her neck; the sweat running from her wet sides was drowned back on her by the rain.

"I have chosen Craven, Miss Carew, in order that I might be quite out of the world; it has proved to me often that I have succeeded, but never so thoroughly as to-night! There's the station, an alehouse, and a few farmers; you can't stay in any of them. We'll drive back then at once to warmth and light."

She thanked him and refused to hear of it. "I shall stay in some one of those houses if they will have me."

He got out of the cart. "There's a fire in the station, Ramsdill?"

"Yes, sir."

"Let me help you out, Miss Carew. Please come in for a few moments and let us see each other, and get out of this infernal dark."

She presented a pitiable sight. Drenched through, her hair clinging to her face, her clothing clinging to her like a vine to a tree. He exclaimed with contrition and anger and drew her to the fire, into the red glow.

"You will be ill—your feet and stockings must be dripping. Drink this." He had his flask and forced her to take a generous draught. To all she was obedient.

"Now," he said determinedly, "you must go back with me—don't retaliate so cruelly! Mrs. Henly will care for you like a mother. I can't leave you here."

But wet, meek as her drenched hair made her look, her reddening cheeks proved that all her blood was not beaten out of her by the rain.

"You must leave me here, Mr. Tempest."

"I wish," he said impatiently, "you were not an American, and a modern woman."

She turned her hands before the blaze and he saw how fine they were, how slender and distinguished.

"I am both, however," she replied with a little smile. "I have failed, and I am going back."

Tempest, without further parley, went to the door and called to Ramsdill:

"Can your wife put this lady—Miss Carew—up for the night, Ramsdill? Give her a good bed and some hot dinner and some dry things?"

Tempest had made of Craven and the Ford a shrine for all the county, and for reasons more human than his genius alone was adored.

"I expect missus'll be pleased," Mr. Tempest.

"Come, then," he ordered over his shoulder to the girl, in a tone as masterful as if he had not been beaten.

"Ramsdill has a very decent cottage not half a mile from the castle—it's clean and well-kept and Polly Ramsdill is a nice creature. I'll let you stay there, or at the castle."

waited impatiently as she put

foot on the step of the cart. She

close composedly:

"Mrs. Ramsdill's, please."

"On the long, wet way back he said: 'I've been a boor; will you forgive me?'"

"You have been most kind, Mr. Tempest."

"No—no—tell me, please, you forgive me?"

"How can you ask it? I should never have so forced myself—"

"You do then—I am obstinate—say the words."

"Well, then, I do, of course, forgive you, Mr. Tempest."

"Will you prove it?"

"If I can."

The Ramsdill cottage, a type of hundreds of low-carved, vine-covered nestling houses, sent out into the rain its one ruddy star through a small window-pane. As the cart approached the door opened and a cheerful bar of light cut into the dark.

"Now," said Tempest, "one more favor, Ramsdill. Can you spare you here to-night? If so, will you drive

She Looked at Her Lodger Over a Giant Bouquet.

me back to Craven? I've sprained my wrist and it has been all I could do to get my mare to the Ford."

Lucy Carew opened her eyes the next morning in the blaze of brilliant day. The 10th of November broke in holiday and golden fashion after a night of wild, unusual storm. In the coarse nightdress of her hostess she lay in her clean bed in the country-smelling little attic. She had scarcely stirred to rise when a knock at her door held her motionless.

Mrs. Ramsdill, red-cheeked, bashful-eyed, came in like a bright apparition, for she looked at her lodger over a giant bouquet; the profusion filled her hands. She arrived like Flora. She had a note and gave it.

"If you please, miss, from Craven—there's a answer to take."

She regarded with pretty, timid curiosity this handsome young lady who stood well out of the short nightdress, her feet gleaming charmingly displayed below the hem. Above the low, plain collar her neck and dark head rose frankly. Women—beautiful women—do not imagine how much to their beauty's enhancing is sometimes the naive garments of their simple sisters. Ribbons and furbelows would not have made Lucy Carew more lovely to look on than as thus the English cottager saw her: the coarse muslin over her swelling breast, her arms bare to the elbows—for Mrs. Ramsdill's gown stopped there. Miss Carew took the roses in her hands.

Mrs. Ramsdill had her wonderings. Tempest was beloved, but he was as well known. Even Cravenford could tell its tales. The good creature mused on her guest and remarked the eyes—how they lost their clearness to sparkle, how cheeks mantled as the letter, with entire ignoring of her company, was broken open.

"I'll wait outside, miss," she delicately suggested, "and you'll call me for the answer?"

Miss Carew held the roses against her and read her note.

Craven, November 10.

My dear Miss Carew: If what you tell me is true (and how can I suppose you have come 300 miles to play with my vanity?) then you will feel it worth your while to write the study of which you spoke—unless my conduct as host has blackened me too much in your eyes.

If you will come—I have sent a carriage for you—I will do all in my power to make it easy for you to write what you wish. There will be no train to London before late afternoon. If you refuse me the proof of your entire cordiality, I shall come to the Ford—to avoid me you will have to walk, and I fancy your shoes will not help you!

Faithfully,

BASIL TEMPEST.

For the first time in weeks Mr. Tempest slept till morning, and for the first time in weeks awakened not a prey to the black horrors that generally perched on his bedpost to wait the opening of his eyes. "If," as he had often grumbled, "one could only get into the day without beginning it!"

To superintend the gathering of a bunch of roses, to write the note he had sent, amused him, and no sooner was Ramsdill and the trap dispatched than, whistling like a boy, he made a tour of the house, followed by Mrs. Henly, to whom he gave countless directions as to setting of Craven in holiday trim. Sunlight flashed at him everywhere. It fell in luxuriant floods down the long galleries, routed melancholy out of nooks in the darkest rooms where ghosts and dismsals that Tempest had grown to consider as familiars nested and hatched.

(TO BE CONTINUED.)

Her Worst Fear.

Willie—"Oh, mamma, that cook has sent has red hair, scars all over her face, a breath that smells like whiskey. She looks awful mad and says she wants to see you."

Failed in Health

"My mother died six years ago," writes Miss Ruth Ward, of Jerseyville, Ill., "and left me to care for six children. I had never been strong; and this, with the shock of her death, was too much for me.

"I failed in health. I was tired all the time and did not want to go anywhere, nor care for company. I had the headache all the time and such bearing-down pains. A very dear friend advised me to take Cardui, as it had done her so much good, so I commenced to use it and now I am in good health."

Take CARDUI

The Woman's Tonic

Women's pains are relieved or prevented and women's strength is quickly restored, by Cardui, the woman's tonic. You yourself know best if you need it, or not.

If you do need it, do not delay, but commence to use it at once. Every day of delay, only lets you slide further down the hill.

Don't wait, then, but begin to take Cardui today, for its use, no matter how prolonged, cannot harm you and will surely do you good.

TWO LADIES FOUND IN PITIFUL STATE

of the two ladies, Mr. Edward Clark arrived and took the remains of Miss Williams to Illinois for burial leaving here Saturday evening.

The comforts of Mrs. Humphrey is being looked after by Miss Mary Heller and Mrs. Cooley a relative who is visiting here. Mr. Clark expects to return soon with a widowed sister of Mrs. Humphrey's who will probably make her home here.

BEEF TRUST PROBE BRINGS MARKET TUMBLE

Investigation Now On Makes Lower Prices

Chicago, Ill., Jan. 24.—Widespread agitation over the high cost of living, coupled with the governments activity against the Chicago packers, caused a general tumble in the speculative markets of the country today, and when housewives heard of it they smiled broadly. Prices for wheat, corn, provisions and cotton, as well as stocks, fell to lower levels under a simultaneous movement on the part of speculators to unload.

Wholesale prices for dressed beef—that is, the choicest cuts—are actually lower, compared with quotations of a week ago. Retail prices are expected to drop correspondingly.

Bowling Season Over

The Eureka Springs Bowling League went out of existence last Saturday evening at a meeting held in the Western Union Telegraph office. The members of the league derived a great deal of pleasure from the games as the season progressed and some of the scores are quite commendable.

The following prizes were awarded, for high individual averages, Terry first, Bently second, Brown third, and Dr. Bergstresser fourth. Terry won both the high 10 and 30 frame individual score prizes.

Railroad team won the first prize for high average, the Merry Widow team won the second prize and also the prize for the team winning the most games, they having won one more than the Railroad boys.

The Arctic captured the prizes for team with the best 10 and 30 framed scores.

White received the prize which was given by Perkins Bros., and Puckett the one donated by the Jordan Drug Company. The Merry Widow team captured the prize which was given by W. H. Adams.

Following is the standing of individuals and teams:

PAVEMENT PICK-UPS

Miss Elsie Hodge of Berryville is visiting her sister, Miss Ena.

Mrs. Musselman of Berryville was the guest of friends here yesterday.

Mrs. Ralph Harrison of Fayetteville is the guest of the family of her uncle, Dr. J. D. Jordan.

Mrs. Wm. Gaskins was the guest of her daughter, Mrs. Ethel Walden, at Gaskins, over Sunday.

Mrs. Brock Smith is here from Kansas City the guest of her parents, Mr. and Mrs. H. E. Rowe.

Mr. and Mrs. Steve Reed are at home after several weeks visit with relatives at St. Augustine, Fla.

Mr. Seth Beasley will soon put in a new walk and curbing in front of his property on Mountain street.

Miss Ethel Woodruff of Fayetteville, was the guest of relatives here the latter part of last week.

Mrs. Joe C. Porch and children are here from Oklahoma the guests of the family of Dr. J. S. Porch.

Messrs. Frank Musgrave and John Messer of Fulton, Kansas, have purchased and taken possession of the barber shop opposite Basin spring.

Frank Keller is preparing to re-enter the meat market business and will open a shop at the old Pendergrass stand opposite Harding spring.

Col. Len Nunnally was over from Green Forest the early part of the week trying to line up the boys in his candidacy for the nomination of circuit clerk.

Mr. Lewis Morehouse and little granddaughter, Pauline Foreman came over from Green Forest Tuesday and went out to the old home place to visit with his son Gus.

Raymond Thompson of Carbonate, Ill., is a visitor here and if proper opportunity affords may make this his home. Mr. Thompson is highly delighted with Eureka Springs and the climate.

CITY COUNCIL'S ADJOURNED SESSION

Body Gets Busy After Lying Dormant for a Season

An adjourned meeting of the city council was held last Friday evening. Alderman Johnson was chosen mayor pro tem as Mayor Fuller was out of town giving attention to his campaign.

Alderman Willis who had been appointed to look into the trouble between the city plumbers and investigate the charges made against the superintendent of the water works made a lengthy report of plumbing jobs he had investigated. He reported many of these jobs as not conforming to the ordinances of the city and says:

"I find that violations have been permitted done by some and others forced to comply with the law, thus working an injustice and showing favoritism."

A communication from Col. C. D. James addressed to the special water committee from the commercial club and city council was read.

The communication sets forth that the Board of Improvement of water districts 3, 4 and 5 is without legal authority to make further improvements to the water works. This communication states that the only manner in which such improvements can be legally made would be to make a new district and in doing this great care will need to be exercised to avoid conflict with the objects for which district 5 was organized.

A petition, setting forth that the water works system is being mismanaged and charging Supt. Dale with arbitrary and wilful ruling as to the use of water and asking for the suspension of the superintendent, was presented with the following signatures:

J. A. Monagan, Wm. Chandler, Mrs. M. E. Phillip, W. L. Hatch, Ella Shuman, J. A. Perry, J. S. Porch, D. A. Ross, Al Hatch, W. J. Harrison, J. W. Benson, Mrs. W. E. Ward, J. W. H. Hixon, J. C. McCreary, W. C. Barrett, J. S. Hixon, J. W. H. Hixon, J. C. McCreary, W. C. Barrett.

Goes to Conference

Rev. W. L. B. Long, pastor of the First M. E. Church left Monday afternoon to attend annual conference which meets this week in Rogers. Among others attending from here are Mr. and Mrs. S. R. Cone and Wm. Jenkins.

It is understood that Rev. Long's pastorate has been highly appreciated by his people and that the church as a body is desirous of having him returned to them. He is a consecrated, christian man, thoroughly devoted to the work he has given his life to and has many friends outside his church here who would be glad to welcome him back.

Ole Peterson

The amusement-going public of this vicinity will be pleased to learn of the engagement of the most successful and funniest of all Scandinavian comedy dramas "Ole Peterson" which will appear at Eureka Opera House on Feb. 17th.

This play has a well defined plot, is wholesome, well constructed and adequately acted. Its incidents, both dramatic and sensational, are unusually interesting, depicting Sw-dish life in the Northwest. The costuming is correct, the stage mounting excellent, and the cast strong throughout. Many pleasing specialties add to the entertainment.

Arkansas Diamonds

The National Irrigation Journal, in speaking of the exhibit of Arkansas diamonds at the Chicago land show, says "this is the only place in the United States where diamonds are found." More accurately, the Pike county field is the only place in the United States where diamonds have ever been found "in place." What might be called stray diamonds have been found in small numbers all over the country; but they are supposed to have been dropped from glacial ice, in days when ice would have been very cheap if there had been anybody to buy it, much as a man might lose a diamond from his pocket. What makes the Pike county diamonds unique is that they are found where they were manufactured by nature, as is shown by the volcanic formation.
